Game Descriptions:-

Counter Strike : Global Offensive

The game pits two teams against each other: the Terrorists and the Counter-Terrorists. Both sides are tasked with eliminating the other while also completing separate objectives. The Terrorists, depending on the game mode, must either plant the bomb or defend the hostages, while the Counter-Terrorists must either prevent the bomb from being planted, defuse the bomb, or rescue the hostages. The game also has matchmaking support that allows players to play on dedicated Valve servers, as well as allowing members of the community to host their own servers with custom maps and game modes.

There will be two coin tosses,one for the map choice and the other for the side selection. Each match will be a "Race to 14" format,i.e. the team that wins 14 rounds first will win the match.

Defence of The Ancients (DOTA) 2

Dota 2 is a multiplayer online battle arena (MOBA) video game in which two teams of five players compete to collectively destroy a large structure defended by the opposing team known as the "Ancient", whilst defending their own. As in *Defense of the Ancients*, the game is controlled using standard real-time strategy controls, and is presented on a single map in a three-dimensional isometric perspective.Ten players each control one of the game's 117 playable characters, known as "heroes", with each having their own design, strengths, and weaknesses.

The game will be held in the Captains Mode format.

FIFA 2018

Each participant will choose a club team of his choice. In case of two opponents wanting to play with the same club, there will be a coin toss to decide who gets the team. Each match will be of 5 minutes on each half, failure to decide a winner will directly lead to a penalty shootout. The participants may use a game-pad or keyboard as per their preference.
